Profile

I've been working with Drupal since *2016*. Creating and integrating front-end part to the site.

Currently I'm in love with **ReactJS** technology, especially **GatsbyJS** v2. There's incredible stack of Front-End technologies which are easy to integrate with **Drupal 8**.

Skills

Drupal 7/8	Javascript'19	Docker
ReactJS	Redux	GatsbyJS
HTML 5 | CSS 3	Twig	PHP
Git	JSON	SASS/Less
jQuery	Bootstrap 4	TypeScript

My value to you

Here's the short summary of my personal and professional skills:

- **English level**: B2 (*Free speaker*)
- implementing both back- and front-end elements;
- skilled with all aspects of Drupal setup, optimization and configuration;
- have successfully worked in teams which delivered large scale projects;
- ability to suggest appropriate integrations solutions and choose efficient problem solutions;
- Scrum / Kanban / Waterfall methodologies;

OLEG KRUCHAY

Front-End Developer

Attended Conferences

Kyiv DrupalCamp 2016, 2017, 2018, 2019
Lviv DrupalCamp 2016
Lutsk DrupalCamp 2017
Lutsk Codesprint 2018, 2019
Lutsk TriviaNight 2018, 2019

WE Dates

May 2019 - Present

Aug 2017 - May 2019

Oct 2016 - Dec 2016

Oct 2016 - Dec 2016

Work Experience

Front-End ReactJS/GatsbyJS v2 Developer at **dev-branch.com**

Middle Full-Stack Drupal 7/8 Developer at **dev-branch.com**

Junior Drupal Developer at **drudesk.com**

Trainee Drupal Developer at **internetdevels.com**

Education Dates

Sep 2017 - Jan 2019

Sep 2013 - Jun 2017

Education

Master degree of Computer Science
Lutsk National Technical University

At 2019 I was graduated to Master degree of Computer Science specialty. My diploma main title is: "Research on the efficiency of using DOCKER technology in the process of creation web-oriented information systems"

Bachelor degree of Automation Tech.
Lutsk National Technical University

At 2017 I was graduated to Bachelor degree of Automation and computer-integrated systems specialty.

OLEG KRUCHAY

Front-End Developer

Full-Stack Drupal Developer

- Drupal 7 -> Drupal 8
- PhpTemplate / Twig
- ApacheSolr, MemCache
- AMP, PWA, Critical CSS
- CI / CD / Jenkins
- API Integration / Google S API
- Drupal8 theming / Bootstrap 3
- auth0
- Amazon AWS

Front-End ReactJS Developer

- Drupal 8 (Headless project)
- ReactJS / GatsbyJS v2
- RestAPI / GraphQL
- SASS
- JSON
- Decoupling process
- JSX markup
- Redux
- PropTypes validation
- React Hooks
- Lodash
- Lando / DOCKER
- Netlify
- Webpack configurations

Latest Projects (NDA)

Financial community, forum
NY, USA (15 month) || Support

The one of the biggest finance communities of USA with forums and articles about working in the financial services industry. At the same time that service is one of the fastest growing jobs and recruiting sites in financial industry of US . It has forums and articles, about applications, career advice, and general information about careers and firms in finance. There are lots of integrations with third party services such as Bullhorn (REST), ZenDesk, etc.
I worked on configuring AMP, PWA and critical CSS for this site with 100% of performance.

*Worked on migration to **Drupal 8***

Team: *4 developers, 1 dev-ops, 1 designer*

Drupal JSON-API in a pair with GatsbyJS v2 RestAPI/GraphiQL. Successful release on Aug 2019

This is a very interesting project where we have Drupal decoupled, having Drupal in the backend with React in the frontend and on top of this, we have Gatsby v2 that gives all the benefits of a static website.
Additionally, it is fully integrated with their CRM and Loft API, so customers can purchase online and access their account and transaction information (all coming from their API).
The team had to deal with a considerable number of blockers and change requests from the client side along the way during 11 sprints, but this didn't stop us from delivering a robust, quality and blazing fast website.

Team: *7 developers, 1 dev-ops, 1 designer, 1 PM, 6 customers (includes designer, dev-ops, QA/QC, head of IT dept. and 3rd party API supporters.)*
